

Akash Kundu

B.Tech in Computer Science & Engineering · Techno India University, Kolkata
akashkundu7487@gmail.com | +91-9064349004 | akashkundu.me | LinkedIn | GitHub

Summary

Computer Science undergraduate architecting full-stack solutions with integrated MLOps and Data Analytics. Demonstrated technical expertise by completing Deloitte Data Analytics simulation and AICTE AI-ML virtual internship. Engineered web applications that embed locally-deployed, high-performance predictive models for real-time inference. Aiming to contribute AI engineering expertise by designing scalable, cloud-native architectures and deploying production-grade models.

Education

Techno India University <i>B.Tech — Computer Science & Engineering CGPA: 7.61/10 (through 5th Semester)</i>	08/2023 – 05/2026 Kolkata
Arambagh Vivekananda Academy <i>Higher Secondary — Science (Class XII) Percentage: 71.6</i>	04/2021 – 05/2023 Arambagh

Experience

Deloitte Australia — Data Analytics Job Simulation <i>Virtual Internship via Forage</i>	04/2026 – 05/2026 Remote
- Processed 10,000+ records of complex datasets, engineering features to surface actionable insights for downstream analytical modelling. - Architected an interactive dashboard visualising 5+ key performance metrics, translating raw data trends into strategic business intelligence.	
AI-ML Virtual Internship <i>All India Council for Technical Education (AICTE)</i>	10/2025 – 12/2025 Remote
Evaluated 3+ neural network architectures during training, orchestrating end-to-end classification pipelines that achieved 90%+ baseline accuracy.	

Projects

AI-based Eye Disease Predictor [Completed] 	Python · PyTorch · OpenCV 01/2026 – 04/2026
- Engineered a Convolutional Neural Network (CNN) trained on 5,000+ labelled images to classify 7 diseases with >85% accuracy. - Automated a diagnostic PDF data pipeline integrating Grad-CAM maps, reducing manual review time by 40% for clinical interpretability.	
COPPER — AI Desktop Productivity Assistant [In Progress] 	Tauri · FastAPI · Ollama 03/2026 – Present
- Architecting a local desktop assistant using Ollama, enabling 100% offline execution of AI models with <50ms latency. - Integrating voice-to-text pipelines processing 10+ daily queries, utilizing database memory for coding and system-level automation.	
AI Hardware Benchmark Engine [In Progress] 	Python · CatBoost · Pandas 02/2026 – Present
- Developing a full-stack machine learning app to predict hardware performance across 3 heavy workloads (e.g., AI inference). - Formulated custom scripts scraping 6+ hardware tables, implementing model serving via FastAPI for targeted upgrade recommendations.	
E2EE Multi-User Chat Application [Completed] 	React · Node.js · WebSockets 11/2025 – 01/2026
- Developed a real-time chat platform supporting 50+ concurrent users, featuring 256-bit E2E encryption and JWT authentication. - Orchestrated WebSocket layers to manage 10+ active chat rooms, achieving sub-100ms message delivery across concurrent sessions.	
Skills	
Languages	Python, Java, JavaScript, SQL
Web & APIs	React.js, Next.js, FastAPI, Node.js, Tailwind CSS, REST APIs
AI & Data	PyTorch, scikit-learn, Ollama (LLMs), Computer Vision, Pandas, CatBoost, PostgreSQL
Tools	Git, GitHub, Docker, CI/CD (GitHub Actions), Azure
Soft Skills	Technical Writing (Advisory Reports), Problem Solving (Log Analysis), Stakeholder Communication
Certifications	
Deloitte Data Analytics Simulation (05/2026) 	Deloitte Cyber Simulation (07/2025) 
AI-ML Virtual Internship — AICTE (12/2025) 	Getting Started with Enterprise AI (08/2024) 
Web Development Bootcamp — Udemy (09/2023) 	Python Bootcamp — Udemy (04/2024)
